

# UNIVERSAL MICRO TOUCH

## 3D Electronic Edge Detector of Basic Point

- Precision Touch Sensor  
Repeatability  $\pm 2$  micron.
- Long Safety Over-Travel Distance protects from damage.  $X, Y = \pm 7\text{mm}$   $Z = 3\text{mm}$
- Red lamp and electronic beep sound notice the touching position. When touching to the work piece, red lamp immediately lights up all around. The one with BT shank gives the electronic beep sound also to make double notices.

### How to obtain touching position

Make the stylus slowly get near to the measuring surface of work piece and the red lamp will light at the moment when the former touches the latter. A position where 3mm is compensated from that position (because of 6mm stylus diameter), is the touching position to be obtained.

# UNIVERSAL MICRO TOUCH with INTERNAL CONTACT SYSTEM **NIKKEN**

**Internal Contact System - can be used for not conductive work piece.**

- Precision Touch Sensor  
Repeatability  $\pm 2$  micron.
- Long Safety Over-Travel Distance protects from damage. X, Y =  $\pm 7$ mm Z = 3mm
- Not conductive work piece can be measured. Internal contact system is built-in.  
Blue lamp and electronic beep sound notice the touching position. After touching to the work piece, blue lamp lights up all around. The one with BT shank gives the electric beep sound also to make double notices.

## How to obtain touching position

Make the stylus slowly get near to the measuring surface of work piece and the blue lamp will light at the moment when the former touches the latter. A position where 2mm is compensated from that position (because of 4mm stylus diameter), is the touching position to be obtained.
