

UNIVERSAL MICRO STAND

NIKKEN

Long Reach 300mm

Free flexing with single knob, no dead angle and long reach, two arms incorporating ball joint mechanism at both ends provide free movement in any direction such as vertical, lateral, longitudinal or rotational etc. If stretched horizontally, a reach as long as **300mm** can be attained. Measurements of inside dia., outside dia., end face and back face etc, can be made at will.

New mechanism permitting no looseness due to vibration

By only tightening the single red clamp knob, all articulated joints are locked firmly and no fine (micron) movement will occur even after being left as they are for 100 hours.

Clamp Mechanism

Strong magnet base makes it possible to adapt to vertical, angular, uneven surface, etc.

Remote Fine Adjusting Knob (UDS-2)

The base is made by heavy and precision casting and arms are clamped by a remote knob with fine adjustment. Measurement position of dial gauge can be easily adjusted without losing setup of Universal Micro Stand.

Remote Adjusting Knob

Code No.	Style
UDS-1	With magnet base
UDS-2	With precision casting base

★Dial gauge is supplied as an option.

Any dial gauge, pick tester can be connected with this attachment.

On M/C

On NC Lathe
